story

Flexible and customer oriented, always!

A. Bottazzo - Product Development Director - BA Cooling Swegon AB

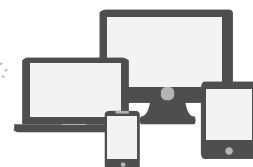

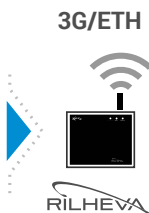

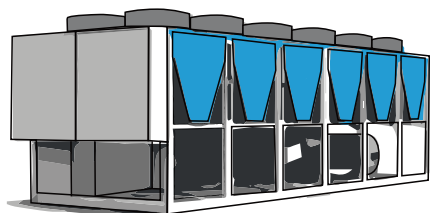

Company in brief

Blue Box is a leading company in developing, manufacturing and selling cooling units and heat pumps. Reducing energy consumption, noise and vibration are its main goal. The company was founded in 1986 and today counts 250 employees. In 2010 **Blue Box** was acquired by **Swegon**.

Goals and challenges

Ensuring high reliability of special units, built according to customer specifications, is the key target. Even the slightest inefficiency could be a critical issue. Analyzing dynamic operation in real context allows to identify critical behaviors, difficult to reproduce in lab tests.

Rilheva solves

Rilheva monitors in real time unit parameters and alerts in case of malfunctions. Furthermore, it allows to act promptly by adjusting unit settings to achieve the best performance in relation to the current working conditions. **Rilheva** provides a valuable support to the service staff during critical commissionings which, in some cases, can be performed remotely.

Why would you recommend it?

Over the years the relationship has evolved, from supplier to partners. We grow together to improve the solution, continuously.
