RILHEVA

*An outstanding experience for efficiency, expertise, availability, and the incredible results achieved.*

**Domenico De Simone** - Managing Director - Casa Angelina

## Casa Angelina

Casa Angelina is a **five-star hotel, part of the Leading Hotels of the World**, located in Praiano, the heart of the **Amalfi Coast**. According to Forbes, it is the second best luxury hotel in Italy. It boasts 37 rooms, two restaurants including one with a Michelin Star, a bar, two massage rooms, and a 100 square meter wellness area.

The continuous desire to excel will lead to the creation of three additional suites and the expansion of the wellness space. Casa Angelina was completely renovated in 2007 with the aim of installing only the best technology available on the market. Today, as then, it remains faithful to this commitment.

## Goals and challenges

In 2022, we decided to invest in innovation concerning thermal and electrical technology, management systems, remote control, and energy efficiency.

We aim for nothing but the best, so we chose Rhoss and **Rilheva**, expertly installed and configured by **Assiclima**. In 2023, with the start-up of the new HVAC units and telemetry, we were able to appreciate that the trust placed in Rhoss, Rilheva, and Assiclima was rewarded with an excellent result.

For the Amalfi Coast, 2023 was a record year for heat intensity and extremely high humidity peaks: achieving excellence under these conditions was a remarkable stress test.

## Rilheva solves

We achieved full efficiency of the plants thanks to Rilheva, the remote management platform.

The management, operating staff, maintenance personnel, and the manufacturer have access to clear and objective real-time data, based on which they can make the best technical choices.

We aim for nothing but the best: **to maximize the performance of the air conditioning system**, ensuring the **best possible comfort** for our high demanding customers.

## Why would you recommend it to others?

In a particularly hot and humid year like 2023, we managed to **reduce energy costs by 10%, improve plant efficiency by 22%, and offer an unparalleled experience** to our guests, customers with very high expectations from all points of view.

Being able to satisfy and sometimes even astonish our very demanding guests immediately turns into an extraordinary reputation, which spreads through word of mouth, a privileged evaluation principle for high-spending international customers.

Rhoss, Rilheva, and Assiclima represent excellence and are the ideal choice for luxury hotels aiming to achieve the highest levels in terms of **comfort** and **energy consumption**.

An excellent experience for efficiency, expertise, and **availability**, proven by the incredible results we have achieved.

As mentioned earlier, we aim for nothing but the best!
